## Summary

---

Software Engineer with 7 years of experience developing frontend and backend services and automating cloud infrastructure. Skilled in building reliable CI/CD pipelines, provisioning infrastructure with Terraform, CloudFormation, and AWS CDK, and developing backend services in Node.js, Python, Golang, and Java. Experienced with AWS, container orchestration using Kubernetes and ECS, and containerization with Docker.

## Experience

---

**Senior Platform Engineer, Mitsubishi UFJ Financial Group Investor Service –** Mar 2021 – Present  
Toronto, ON

- Developed and deployed a FastAPI (Python) GitLab backup/restore solution hosted on EKS, using ArgoCD and Kustomize for deployment and environment configuration, securing 1K repositories against extended outages and accidental deletions.
- Implemented and managed automated CI/CD pipelines, drastically cutting production deployment time from 4 hours to 15 minutes using GitLab CI, CodeDeploy, Python, bash and Powershell
- Streamlined production deployment and increased secure secret and application configuration injections by implementing automated build and deployment processes using Jenkins and Python/Node.js Lambda functions.
- Supported and debugged and maintained Java, Python, and Dotnet applications, playing a key role in restoring critical systems and preventing future outages.
- Migrated 6 legacy Maven and Dotnet applications to AWS within 2 years, provisioning cloud native resources, optimizing system performance and automating build, test, and deployment processes

**FullStack Developer, Airborne App –** Oakville, ON Aug 2020 – Mar 2021

- Developed features on existing Golang services that interact with multiple AWS services
- Integrated user-facing components on frontend apps with React, TypeScript, and SASS, improving overall user experience and app performance
- Developed an ephemeral testing environment pipeline using GitHub actions, terraform and S3, accelerating frontend validation processes and streamlining collaboration between developers, product owners, and designers within 6 months

**FullStack Developer, EllisDon –** Mississauga, ON May 2019 – Apr 2020

- Developed and maintained services using ReactJS, Spring Boot (Java), Express (Node.js), NestJS (TypeScript), and MongoDB. Ensured seamless feature integration, bug resolution, and codebase enhancements for improved maintainability.
- Optimized project maintainability through automated CI pipelines for unit testing and code linting

## Skills

---

**Languages and Frameworks:** Java, TypeScript, JavaScript, Golang, Python, Bash, Powershell, Sql, Spring Boot, Flask, Gin, Vue.js, Angular, ReactJS

**Infrastructure, Monitoring & CI/CD:** Terraform, Terragrunt, AWS CDK, Cloudformation, CodeDeploy, CodePipeline, CodeBuild, CircleCI, GitHub Actions, Jenkins, GitLab CI, ArgoCD, Datadog

**Containerization & Orchestration:** Docker, Podman, Docker Compose, Helm, ECS, Fargate, Kubernetes

## Education

---

**Sheridan College,** Bachelor of Computer Science - Mobile Computing Sept 2016 – Apr 2020

**Sheridan College,** Computer Systems Technician – Software Engineering Sept 2014 – Aug 2016
